Future Doctor Programme

Future Doctor was created by current medical students after experiencing the daunting process of Medical School application, and wishing they had better resources and help while going through this. The programme is run in a yearly cycle and includes the events below:

January/February: Virtual Work Experience

An interactive session going through cases with live simulated patients. Aimed at Year 11-12s.

April AND May: Should I Become a Doctor?

A session that highlights what medicine is, as a university degree and a career. We discuss how to get there, and alternatives to consider if you aren't sure. Aimed at Year 9-12.

June: Future Doctor

Looking at the application process in detail, with lots of hints and tips on how to get a place into medical school. Aimed at Year 12-13+.

June: UCAT

A course used to help students with their UCAT revision, including teaching and practice questions. Aimed at students who are sitting the UCAT in the next few months.

July: Simulated Work Experience

Interactive in person event, where we will go through simulated cases and practical skills. Aimed at Year 12-13+.

September: Personal Statement Workshop

Advice on how to write and perfect a personal statement before sending it off for the UCAS deadline. Aimed at Year 13+ applying for medicine this year.

October AND November: Interview Course

An interactive workshop and 1:1 Mock Interview stations to help prepare students for upcoming medical interviews. Students will receive personalised written feedback to help them improve. Aimed at Year 13+ with very limited places.
